

Person Clipping Files

The person clipping files contain newspaper clippings, articles, biographical data, papers by or about current or past staff members, notable personas, and other individuals relevant to Athabasca University.

The files are arranged alphabetically by surname. The files are compiled on an ad hoc basis and may not cover all individuals or, an individual's entire history, and also may not be the only source of information in the Archives attributable to that person.

For more information check the Archives Database or contact the Archives directly.
